# MyWay

All the support kids need to  
do it their way

Supporting Children

# I'm ready to go, MyWay!

**MyWay** is the leader of the pack when it comes to maximising opportunities for independent movement and giving children the freedom to explore their world. The genius behind this is **MyWay's** revolutionary supportive harness and minimalist open-front, hands-free design.

## UNIQUE CORSET-LIKE HARNESS FOR OPTIMAL STEPPING PATTERN

- Provides core trunk stability required to develop head and limb control
- Hug-like effect which increases sensory feedback, dampens involuntary movement and increases confidence and chance of succeeding

## OPEN-FRONT DESIGN FOR EXPLORATION AND PARTICIPATION

- Being hands-free, children can easily touch, feel, learn, discover, take part, play- the choice is theirs
- Open-design allows therapists to get close to the child and work with their lower limbs whilst they are in **MyWay**, facilitating guided movement and maximising the potential for therapeutic benefits

## EASIER TRANSFERS

- Direct transfers eliminate the need for additional hoisting slings and make the most out of therapy time
- Delivers superior comfort as the harness does not slip into the armpits

## Freedom to Explore

### Meet Gemma

After Gemma's first experience of MyWay she achieved independent stepping which she hadn't been able to do in any other walking device.

**“This is the best piece of equipment I have seen in a long time! Gemma is having fun while exercising”**

[Gemma's Mum]
