

Genumedi®

Knee support with patella silicone ring

Also available as Genumedi® E+motion (p. 116)

Indications

- light instability of the knee joint
- articular effusions and swellings
- chronic post-operative and post-traumatic inflammation
- osteoarthritis and arthritis
- patello femoral pain syndrome

Mode of action

- the massage effect achieved by the compressive fabric and silicone insert improves the blood circulation and aids absorption of haematomas and oedemas
- the seamless, tailored knee support improves proprioception and improves muscular support (stabilisation of the knee)

Variants

Genumedi® Standard

Genumedi® extrawide with innovative cuff

Genumedi® extrawide with topband

Genumedi® customised

Product benefits

Integrated silicone patella donut with 3D profile for a gentle massaging effect.

Special inner border for the silicone ring provides maximum pressure relief for the patella.

Integrated silicone dots ensure an effective grip.
