

Joy. Knowhow. Responsibility.

It's how we keep the world moving.

**We don't just move people.
We put people on the move.**

Over the years, our company has grown to be a reliable name in the Middle East by providing people all over the region with high quality medical equipments.

More importantly, we empower them by restoring faith in their abilities to lead better lives.

Our innovatively designed wheelchairs, physio-rehab products and healthcare services, aren't just about enhanced mobility, it's about driving people forward.

Quality care is a matter of trust.

Our focus is on delivering quality products and services regularly through our association with leading suppliers of rehabilitation products.

The right selection always counts.

Our medical rehabilitation equipment from our globally aligned supply chain of trusted specialists provides greater quality, affordability and easier access to the healthcare system, ensuring the people we serve get better care.

Mobility works better, when customised.

Every individual has a different challenge when it comes to disability.

By customizing our versatile range of mobility products to suit their needs, backed by the highest quality standards, we can provide total comfort with adaptable equipment and sizes.

Our wheelchair applications cover:

- Standard
- Electrical
- Active
- Sports
- Pediatric
- Bariatric
- Geriatric
- Multi-function

Efficient seating systems & aids.

Children pass through different stages of growth.

We deliver seating systems and aids that are either custom-made or off the shelf to match the positioning within this growth cycle.

Keeping comfort and safety, top of mind!

Our seating system covers:

- Modular seating systems
- Custom seating
- Car seats
- Early intervention aids
- Therapy chairs
- Sleep systems
- Seat moulds

Standing & walking aids.

Our standing and walking devices greatly improves the lives of those who are limited to using a wheelchair. These products are designed to suit flexible positioning and assist the mobility of patients, which encourages standing and walking for longer period of time. Thereby enabling them to be more independent.

Our standing & walking range covers:

- Prone standers
- Supine standers
- Adult & pediatric walker
- Rollator
- Forearm & auxiliary crutches
- Walking sticks

Being sensitive to special needs with sensory products.

Sensory Integration Therapy uses play activities in ways aimed at changing how the brain reacts to touch, sound, sight and movement. A Sensory Room, is a specially designed room that combines stimuli to help individuals develop and engage their senses with lights, colours, sounds, sensory soft play objects, and aromas allowing the patient using it to explore and interact without risk. An example of this is 'Snoezelen' or controlled Multi Sensory Environment (MSE), a therapy for people with autism and other developmental disabilities, dementia or brain injury.

Sensory Equipment is a vital tool in helping to treat sensory disorders in both adults and children. Over the years, we have developed an effective range to help in many situations for all kinds of abilities, with the purpose of helping make life better and helping sensory development. They help develop key life skills such as vocalisation, gross motor skills, colour, recognition and tracking amongst others.

Our design service allows you to pick the right equipment to improve the quality of life for those you care for, no matter what their abilities.

They cover sensory equipment packages such as:

- Sensory room packages
- Sensory pools
- Sensory bathrooms
- Sensory gardens

Hospital Equipments "Care Begins Around You."

At JKR International, understanding customer needs come first before understanding the products that meet those needs efficiently to the highest stringent quality standards. - Stools
- I.V. stand
- X-ray viewers
- Diagnostic products
- Pulse oxymeter
- First aid products

EMPOWR 3D KNEE™

10 YEARS
OF CLINICAL SUCCESS

Stay in motion even when mobility is the greatest challenge with our 3D Knee Implant System

The designers of the EMPOWR 3D Knee™ were among the First to study the knee during early Flexion, providing new insight into how the natural knee functions. The combination of this new knowledge with previous research of deep knee Flexion led to a knee replacement design which provides inherent anterior-posterior knee stability and recreates the motion patterns of the natural knee. The EMPOWR 3D Knee™ addresses natural motion throughout a full range of motion, from early to deep Flexion, creating a more natural feeling knee for the patient.

Benefits:

- Enhances quadriceps function
- Improves femoral/patella mechanics
- Improves ROM
- Reduces contact stress

Need support? Trust our Orthopedic solutions.

Injury. Age. Sudden complications. But none of these unpredictable challenges have to restrict anyone anymore.
