

Manumed active

Soft wrist support with stabilising splint

Indications

- wrist injuries, e.g. sprains, distortions
- osteoarthritis of the wrist
- instability
- tenosynovitis
- irritative conditions (post-traumatic, post-operative and rheumatic)

Mode of action

- the volar splint stabilises and reduces stress on the wrist
- the circular strap compliments the stress relief provided by the compressive knit and the volar hand splint
- pinpoint pressure relief on the ulnar styloid process enhanced by the anatomically designed strap

Product benefits

The soft knitted end in the lower arm area ensures a pressure-free edge without curling or constricting.

Strap opening for correct positioning of the strap and to relieve strain on the outside of the wrist.

Optimally-sized hand splint offers both large and small hands effective support and stabilisation.

Accessories

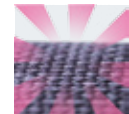

The pull-on aid included aids application.
