

ProLift A 333

The ProLift A333 in detail

A Manual control with two speed variations

B Adjustable handle bar

C Innovative changing system at the sling bar for quick insertion of different sling models, e.g. slings for adiposity.

D Care electronics with intelligent cycle and operating data counter. Soft start/stop function, emergency operation for hoisting and lowering.

Accessories (optional): The patient scale is a class 3 scale with a max. patient weight of 400 kg.

ProLift A 333

Adiposity patient hoist made from aluminum

With its functional versatility, the mobile aluminum hoist **ProLift A 333** is a multi-talent coping with a wide range of hoisting situations. Despite its lightweight construction, it is a highlight in ergonomics and functionality.

The ProLift A 333 is the strongest aluminum patient hoist of its kind. It was developed for professional use in everyday hoisting and transfer situations. It can easily hoist patients from a sitting or lying position – elevated or right off the floor – enabling care givers to mobilize or vertically position patients up to 320 kg without effort. The ProLift A 333 can be combined with a comprehensive range of accessories.

ProLift A333 in use with the Walksupport.
Further slings see page 15.
