

- ✓ Eliminates the need to lift
- ✓ Provides a wide range of equipment to suit a variety of handling tasks
- ✓ Allows patients to be transferred safely, in comfort and with dignity

Ultra Slide Sheets

The ULTRA range of slide sheets allows three basic patient handling tasks without the need to lift and without the risk of sheering to the patients skin.

1. Turning a patient: for x-ray, surgical procedures, recovery, pressure care, change of dressing or cleaning.
2. Sitting a patient up in bed: for feeding or relief of chest pain etc.
3. Moving a patient on or off a bed, trolley or examination couch without painful sheering to the hips and shoulders.

Flat Sheets
with handholds

LOCO-123

Flat Sheets

Developed as an alternative to using tubular slide sheets, the Flat Sheet incorporates a number of handholds, which allows a positive grip when carrying out a patient handling task. The Flat Sheet can be used singly or in pairs and enjoys the same low friction qualities as the Ultra Slide sheets listed above.

LOCO-116 (200cm x 71cm) Flat Sheet - Standard

LOCO-128 (200cm x 90cm) Flat Sheet - Wide

LOCO-129 Handy Pack (Contains two standard Flat Sheets and a Compact Slide Sheet)

LOCO-123 Extension Strap
