

medi Epibrace

Epicondylitis strap

Now available in three colours

Indications

- epicondylitis (e.g. tennis or golfer's elbow)

Mode of action

- reduction of the stress on the inflamed muscle and tendon attachments in the elbow due to the direct press from the pad onto the lower arm musculature

Product benefits

Flexible pad: can be used anywhere, on the left and right, as well as for golfer's and tennis elbow.

New wave structure and pad with 3D profile improve the removal of lymph fluid.

Soft edge: gentle on the skin, does not dig in.

Precise pressure adjustment thanks to the numbering scale on the strap.

Even easier to put on thanks to the support strap.

grey / grey

magenta / grey

lime / grey

Usable until 36 cm
circumference lower arm

size universal
