

Intelect[®] High Power Laser HPL7 & HPL15

Features & Benefits

- Deep tissue penetration with power up to 15 W
- Optimal tissue absorption due to the 2 or 3 different wavelengths: 810 nm, 980 nm and 1064 nm
- Different emission modes for optimal output adjustment
- Preset protocols for easy application
- Large Touch screen, 7 inch with an optimal interface flow
- Automatic laser source calibration
- Safety footswitch operation

The Chattanooga High Power Laser **raises the game** of laser treatment; its higher power achieves greater photonic delivery, **shortening treatment times**, generating a thermal effect, and **improving healing**.

It can almost **immediately arrest soft tissue and joint pain**. Its 3 wavelengths allow for **optimal tissue absorption** and it can achieve much **greater penetration depth** than its low-power counterparts.
